

Scanditron Eco Wipe

Product overview:

Scanditron Eco Wipes are composed of 49% cellulose and 51% polyester. The wipes are manufactured from the purest components in the ISO Class 5 cleanroom environment. Wipes are a perfect solution for the high precision applications, they do not leave particles, are mechanically strong and offer high absorbency. Their competitive price makes them also perfect for general cleaning applications.

The wipes are rolled economically, there are 500 sheets in each roll to make the package economic and handy. The large size of the wipe and its high absorbency means that most of the tasks can be done with only single sheet. Save material and reduce costs !

Our wipes are mechanically treated so they are soft and gentle. Compared to the competitive products Scanditron Eco Wipe can be easily crumpled in the hand and will not scratch the surfaces.

Product specification:

Basic Weight:	55 g/m ²	Absorbency	
		Extrinsic:	263.00 ml/m ²
		Intrinsic:	4.78 ml/g
Contamination Characteristics:		Ion Content	
Non-volatile residues:		Chloride	≤ 70.0 ppb
DI Water	<1.9 mg/g	Sulphate	≤ 70.0 ppb
IPA	<0.4 mg/g	Total anions	≤ 130.0 ppb
		Ammonium	≤ 70.0 ppb
Particles, Readily releasable		Organic Contamination	No detectable silicone oil, amide or DOP.
Particles 0.5 um	≤ 3800 counts/cm		

Available Size:

Part number	Wipe width	Wipe Length	Wipes per roll	Core ID
SCW3037 500	30cm	37cm	500 wipes	30mm
SCW3037 200	30cm	37cm	200 wipes	30mm
SCW2537 200	25cm	37cm	200 wipes	30mm
